#### Background Information Terminal C Expansion

Terminal C is a new airport terminal that recently opened to the public in September 2022 with airline service to domestic and international destinations. It is a state-of-the-art facility that includes 15 airline gates with a landside terminal, using the latest technology. Terminal C is connected to a multi-modal transportation facility that includes a variety of ground transportation options, including passenger rail. As a result of the 2020 COVID pandemic, the Authority's Capital Improvement Plan was scaled back and portions of the Terminal C program were deferred to a later date. With passenger volume returning, the Authority intends to commence development activities of previously-deferred projects. If you would like more information on Terminal C Expansion Projects, join the Community Outreach Event webinar. Please use the link below to register for the Community Outreach Event.

**Tuesday, November 22, 2022, at 1:00 p.m. EST**
